# Product Manager IFRS

## Complying with regulations accurately and correctly

### Description

The Product Manager IFRS analyses the requirements defined by customers, the International Accounting Standards Board ( [www.iasb.org](http://www.iasb.org)) and national legislation which he/she then incorporates into the software solution, usually working in close co-operation with the appropriate customer business division. He/she sets out the functional specifications, supervises technical implementation, develops test scenarios and compiles training information including the relevant documentation. The Product Manager IFRS provides support for training measures and product demonstrations and acts as a competent host at customer workshops.

### Corporate Integration

Depending on qualifications, the Product Manager IFRS is assigned to either the Product Management or Product Sales Department (sales support) and reports to the Head of the department in question.

### Area of Responsibility

The Product Manager IFRS is entrusted with the further development of products in the IFRS sector. He/she is responsible for the operation and design of the application and acts as a contact for our customers in aspects of product design.

### Requirements

Languages: German, English (proficient in written and spoken English)

Qualifications: university degree in Economics, Mathematics, Computer Science or Business Administration

Experience: working experience would be an advantage

- In an IFRS environment or
- Financial consulting or
- In a business division/accounting department of a bank
